Window profiles REHAU
Quality confirmation

Dear Sir or Madam,

We hereby confirm that the profiles from the EURO DESIGN 70, BRILLANT DESIGN, SYNEGO and GENE0 window systems are produced in all European plants according to the same quality criteria and that there are no different qualities within the system for different delivery areas.

The internal specifications for testing the profile and material quality are carried out according to a uniform standard, regardless of the plant in which the profile is produced. All our manufacturing plants and locations are subject to the ISO 9001:2015 quality standard, and all occupational health and safety measures are also complied with.

The profiles meet the requirements of EN12608-1.

The fulfilment of the quality requirement can be seen on the profile in the printed marking, e.g. "EN 12608-1", or the logo of the corresponding quality assurance.

Within the scope of the national quality assurances, neutral testing institutes in the form of regular audits also monitor compliance with the profile and material quality externally.

Best Regards

i. V. Saskia Aschenbach
